RE: Change in FCC Identification filing in accordance with section 2.933(b)

This memo is in regards to a change in identification for a current Motorola Solutions type approved transmitter.

Per KDB#178919, item 6(g), the applicant should obtain written permission from the original grantee holder to file an application.

I hereby give permission to Steve Payne of Cambium Networks to submit an application transferring control of the following transmitter:

ABZ89FT7638

Cambium Networks will continue to manufacture the device from the exact design drawings and printed circuit board layouts used by Motorola Solutions. The form, fit, and function of the radio is identical to the equipment that is currently in production.

Please contact me if you need further information or have any issues or questions.  
Regards,

Ken Weiss  
Senior Staff Engineer
